

Autonomous **D**ependant **S**urveillance **L**ightweight

- It is an ADS-B like system for UAVs
- High data bit rate (100 Kbps)
- Very low power transmission (25mW / 500mW)
- Uses SRD860 free radio Band
- Suitable for high density drone operation
- Data packet using *iConspicuity* payload format
- *iConspicuity* complies with AMC1 SERA.6005(c) as proposed in **EASA** NPA 2021-14
- Will be required for drones operation in Europe
